NEW FUNCTION CODES	FUNCTION	PASSWORD
Enable / Disable Surcharge Confirmation	17	N/A

VERSION:	R404 R5
DATE RELEASED:	10th December 2021

1. *TMS after RKI*
   This function has been removed

2. *Implementation of the ENTER key to initiate a purchase transaction*
   At the idle screen – pressing **ENTER** will initiate a purchase transaction. The F1 key will work as normal

3. *Brightness Control Activata Appl*
   Brightness control – fixes applied to Activata app to accept changes made to screen brightness levels

4. *Move 5000 - 4G doesn't reliably fall back to 3G when using Spark Prepay and M2M SIMS*
   It is now possible to lock the Move 5000 down to 3G if there is an issue with fallback from 4G to 3G when using Spark Prepay/m2m Sim's. (Function 16) Please refer to bulletin 28
   Note: This fix is a "work around" and we are still working with Ingenico on a more practical solution

5. *MAN PAN Confirmation prompt*
   Fix has been applied to ensure after the terminal resets the function still available (Function 13)

6. *Move 5000 – lost link issue*
   Move 5000 Lost link issue has been fixed

7. *Nitro Deactivation Password added*
   We have Implemented a function on TMS that will allow a password to be required when deactivating/ activating Nitro. This will stop Merchants from having access to switch the terminal back to Standalone.

8. *New Function Codes*
